

PRODUCTION SOLUTIONS

WORLD CLASS TECHNOLOGY AND ENGINEERED IMPROVEMENTS TO OUR CLIENTS' OIL & GAS PRODUCTION.

- ★ Engineered production for long term development
- ★ Enhanced production of proven fields
- **★** Faster delivery of first oil revenues
- **★** Innovative technology

For 25 years, Eunisell Production Solutions, has helped oil and gas producers achieve first oil revenues faster by delivering world-class technology and engineered improvements. Our customer base includes 90% of major oil and gas companies operating in the region.

We deliver our services: Production Facilities, Production Enhancement, Produced Water Solutions, Operations & Maintenance and Testing & Drilling, into markets across the African continent - with a team of seasoned oil and gas professionals. Our modern fleet is equipped with production management assets and support

tools, operated by experienced operational staff with extensive experience in production enhancement and delivery.

Emphasis is placed on fast-tracking projects in order to achieve first oil and revenue generation sooner.

Mission

To be trusted by our clients to deliver the best services available, following quality-driven processes in a safe and environmentally responsible manner.

OPERATIONS

For our clients who have established production and development programmes, Eunisell provides equipment and services to test, evaluate, and enhance production.

To empower our clients who are working to begin or grow production, Eunisell can accelerate the time to first oil and access revenues faster and provide a path to sustained production through EPCC projects with limited capital cost. We offer a turnkey solution, providing engineering, experienced personnel and equipment,

"Eunisell invests a portion of the revenues back into the project, allowing funding of capital expenditure, engineering and construction."

enabling our clients to be operational from the start.

Self-Sustaining Production Management

By working in partnership with our clients, we reinvest a portion of the revenues generated back into the project. This allows the funding of capital equipment expenditure, engineering and construction costs during the initial years. We provide operation's management, maintenance and training with the objective of the business owning the facility outright and managing its own profitable operation within 3 to 5 years.

Even from a small revenue stream of sales from just 1000 to 2000 BPD as a start-up, Eunisell Solutions can help grow the operation upward to 50,000 BPD and beyond.

Our modern fleet and assets enables clients to be operational from the start.

Eunisell is a certified by Bureau Veritas as an ISO 9001:2015 company.

The international certification relates to Eunisell's Quality Management System in respect of the company's ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements.

Eunisell aims to enhance customer satisfaction through the effective application of the system, including processes for improvement and the assurance of conformity.

The benefits accrue to our customers, as the rigid international standards, ongoing training and audits, ensure that the Eunisell Quality Management System and management of processes, resources, standards, measurement, analysis and improvement through to delivery, are not only maintained, but constantly reviewed and improved upon.

QUALITY, HEALTH, SAFETY AND ENVIRONMENTAL STANDARDS

CORPORATE SOCIAL RESPONSIBILTY

In football, the introduction of the Eunisell Boot in 2018, which is awarded to the highest goal-scorer in the Professional Football League in Nigeria, is changing players' lives through financial reward and increasing interest and support in the top flight league. Our sponsorship of Rivers United FC, is the longest-standing in the NPFL which has helped elevate the club's performance and morale.
